cubicle curtains

Cubicle Curtains

Healthcare spaces often present unique challenges in creating comfortable, well decorated spaces, given the limited tones and finishes required by the industry in order to best serve such a large audience. With cubicle curtains, you can add style by choosing unique and interesting fabrics, adding color and energy to a space without having to remodel or spend a lot of money.

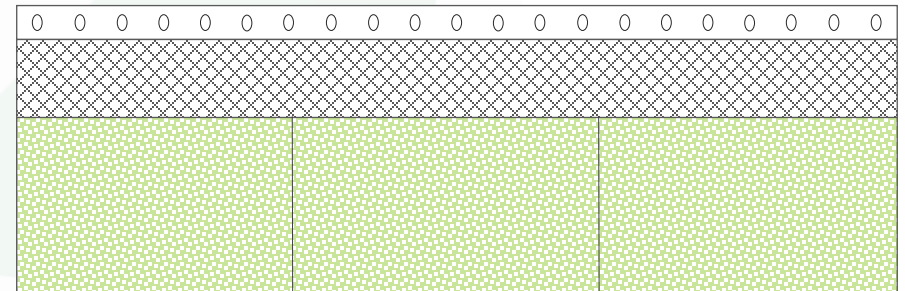

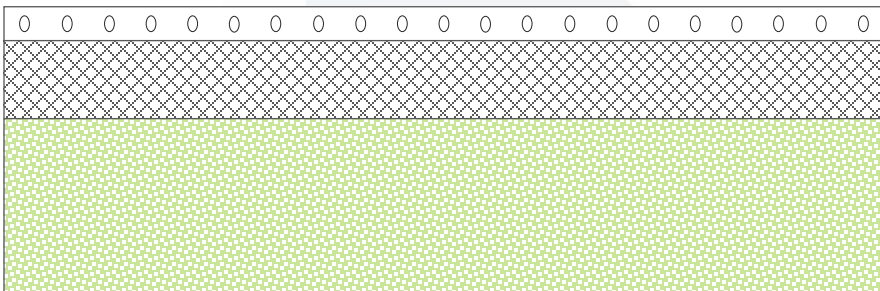

Westport's cubicle curtains and privacy panels are manufactured in keeping with stringent industry regulations. We offer options in fire-retardant fabric and mesh, ensuring that we meet or exceed local, provincial / territorial, state, and federal regulations.

In many facilities, the length of a curtain track will vary from room to room. Our cubicle curtains offer solutions for locations where you want your curtain to be custom sized to match your track. We take the length of your track and add 10% for fullness, thereby ensuring that your curtain will provide your guests with the privacy they expect.

Cubicle curtains will be manufactured differently, depending on the fabric that you select and the way that the pattern is woven on that fabric.

If it is a railroaded fabric, then your cubicle curtain will have a seamless fabrication (meaning there won't be any seams running vertically on it).

If it is a non-railroaded fabric (or "Up the Roll") pattern, then your cubicle curtain will be manufactured from various panels that are sewn together. We make sure that our patterns are matched, so even though your curtain will have a seam running vertically, the pattern will be uninterrupted.

Standard cubicle curtains and privacy panels are available with White or Buff mesh. Our standard mesh length is 20", but we will customize to your size requirements.

Cubicle Curtain Fabrics

Westport partners with a variety of known industry fabric suppliers to offer a large selection of cubicle curtain fabrics. We maintain a commitment to offering fresh, bold, and inspired textiles to our customers. Below we have shown a selection of cubicle curtain fabric options. For more options, or to order samples, please contact a Project Manager. All samples will arrive free of charge, so you can always get a perfect match!

Options

Below are fabrication details and options for our cubicle curtains and privacy panels.

Size

- Width equal to length of track from which curtain is hung plus 10% added fullness, but not less than 12", added fullness.
- Length equal to floor-to-ceiling height minus 20" from finished ceiling at top, and 10" - 15" above the finished floor at bottom.

Hems

- Top: 1.5" wide, triple thickness and double lock stitched.
- Side: 0.5" wide turned and single lock stitched.
- Bottom: 1.5" wide, triple thickness and double lock stitched.

Buttonholes

- Sewn, vertical buttonholes, evenly spaced for hanging symmetry.

Grommets

- Two piece, rolled-edge, rust proof brass; spaced not more than 6" on center; machined into top hem.

Mesh Top

- 20" wide, 0.5" hole, flame-resistant nylon mesh.
- Available in White and Buff.

Tieback

- 2" coordinating tie-back with aluminum Velcro plate.

Baton *(when specified)*

- 60" length x 0.375" diameter fiberglass

Cubicle Track Hardware

- Anodized aluminum with roller carriers.
- Ceiling mounted brackets included.

Fabrics

- Contact a Project Manager for information on our full selection of Cubicle Curtain fabric.

Anti-Microbial Treatments

- Westport is pleased to offer the latest in anti-microbial treatments as an additional finish option on our cubicle curtains. Anti-microbial technology is used to protect your staff and patients, helping to reduce exposure to hospital-acquired infections.
